

# IRELY'S HANDHELD SCANNER

iRely's Handheld Scanner Mobile Module integrates seamlessly with your existing inventory management system, offering a user-friendly interface and robust functionality. Key features include real-time inventory control, efficient handling of inventory receipts and counts, and the ability to update and publish price books. Additionally, it supports effective returns handling and utilizes a built-in scanner for quick and accurate barcode scanning.

## Real-Time Inventory Control

Export price books to handheld devices, update and edit inventory details, and publish price books directly from the device. This ensures that all inventory and pricing information is current and accessible.

## Efficient Inventory Handling

Manage inventory receipts, perform inventory counts, and conduct regular stock counts using the handheld device. This streamlines inventory processes, making them faster and more accurate.

## Effective Returns Handling

Streamline the process of handling returned items, ensuring they are processed efficiently and accurately. This helps maintain accurate inventory levels and reduces discrepancies.

## Convenient Scanner Use

Utilize the scanner for quick and accurate barcode scanning. This feature simplifies the process of inventory management, reducing manual entry errors and saving time.

## INCREASED RETAIL EFFICIENCY

- **Increased Efficiency:** Automates and streamlines inventory management processes, saving time and reducing labor costs.
- **Improved Accuracy:** Real-time updates and barcode scanning reduces the risk of human error, leading to more accurate inventory records.
- **Enhanced Decision-Making:** Access to up-to-date inventory data allows for better decision-making regarding stock levels, purchasing, and sales strategies.
- **Cost Savings:** Improved inventory management can lead to cost savings by reducing excess inventory and minimizing stockouts.
- **Better Customer Service:** Accurate inventory levels ensure that customer orders can be fulfilled promptly, improving customer satisfaction.
