

SMART TANK AND EQUIPMENT MANAGEMENT

Our ERP software is the ultimate solution for managing tanks and equipment with precision and ease. It's designed to streamline operations, enhance profitability, and ensure compliance across all levels of your business.

MAXIMIZE EFFICIENCY WITH OUR SOLUTION

CONSUMPTION SITES

- Manage tanks, order fuel, create work orders, and monitor tank level readings.
- Configure fees for pump-off, freight, regulatory compliance, HazMat, split deliveries, and custom fees.
- See details of Degree Day Forecasting, Forecasted Deliveries, Run Out Dates, and Consumption Metrics.
- Uses Julian Calendar to Forecast deliveries.

ORDER MANAGEMENT SYSTEM

- Order fuel for your tanks, lubricants, and other packaged goods from the convenience of a single entry point.

TANK LEASE MANAGEMENT

- Annual billing for tank leases with the ability to automatically waive the fee if minimum usage levels were reached.

COMMUNICATION AND COORDINATION

- Mass generate fuel orders using Degree Day, Julian, and estimated percentage left with settings to consider hold status, past due, and credit limit considerations.
- Proactively notify customers for tank refills, maintaining uninterrupted service.
- Efficiently dispatch driver orders through email and in-truck systems, optimizing delivery times.

TANK RECONCILIATION AND REGULATORY REPORTING

- Tank Reconciliation becomes easy with iRely's Tank Reconciliation Utility.
- Perform a monthly "true-up" to bring book and actual inventory levels into alignment.
- Daily "Unaudited Tank Reconciliation" reports make it easy to spot theft, missing or inaccurate delivery records, or inaccuracies in sales data.
- iRely's "Regulatory Tank Reconciliation Report" makes SIR reporting a snap.

INTEGRATED WITH TANK MONITOR SYSTEMS

Diverse Data Import: Our software integrates with Wesroc, Ecogreen, and Anova, importing and utilizing tank level data to inform your operations.
