- Accurately track and account for items.
- Generate custom reports effortlessly with our comprehensive set of pre-built reports and tools.

SUBSTITUTE ITEMS

- Increase sales through quick identification of compatible substitutes.
- Streamline sales order creation by grouping similar items.
- Track products by their product name via lookup field.

ITEMS BLEND

- Create and store blending formulas within the system.
- Achieve accurate cost and margin tracking by including raw materials, labor and packaging in formula pricing.
- Know what is on-hand and what needs to be purchased to complete an order.

PRICING

ELECTRONIC PRICING IMPORTS

- Receive vendor pricing, make mass price changes and import them into iRely.
- Provide accurate pricing at guaranteed margins with pricing that flows through raw materials and finished goods to orders and invoices.
- Import pricing on your schedule and ensure margins will not be lost by leveraging "effective date" functionality.

SPECIAL PRICING

- Automate pricing and guard margins to out-price your competition through lower prices or more pricing options.
- Establish pricing by customer, product, or class of product. Prices can be fixed or float with cost or current selling price with iRely's intelligent pricing feature.
- Set special pricing an individual items.

SALES CONTRACTS

- Create and automate contract pricing.
- Track prepaid, dollar, and regular contracts.
- Automatically track and apply dollar and gallon limits to ensure pricing and margins are calculated correctly under contract terms.

REBATES AND BUYBACKS

- Speed up in data entry and receipt of rebate funds.
- Eliminate manual method of tracking and be able to identify eligible transactions and create files to upload to the vendor's site to get your rebates.
- Ensure accurate COGS with sales analysis reports that include vendor rebates in the gross margin calculations.

ACCOUNTING

Our accounting software is a comprehensive ERP solution, which includes a complete set of native accounting financial tools, CRM and industry-specific functions that enable you to improve your operational efficiencies, saving you time, money and effort.
